Parkside
YERONGA

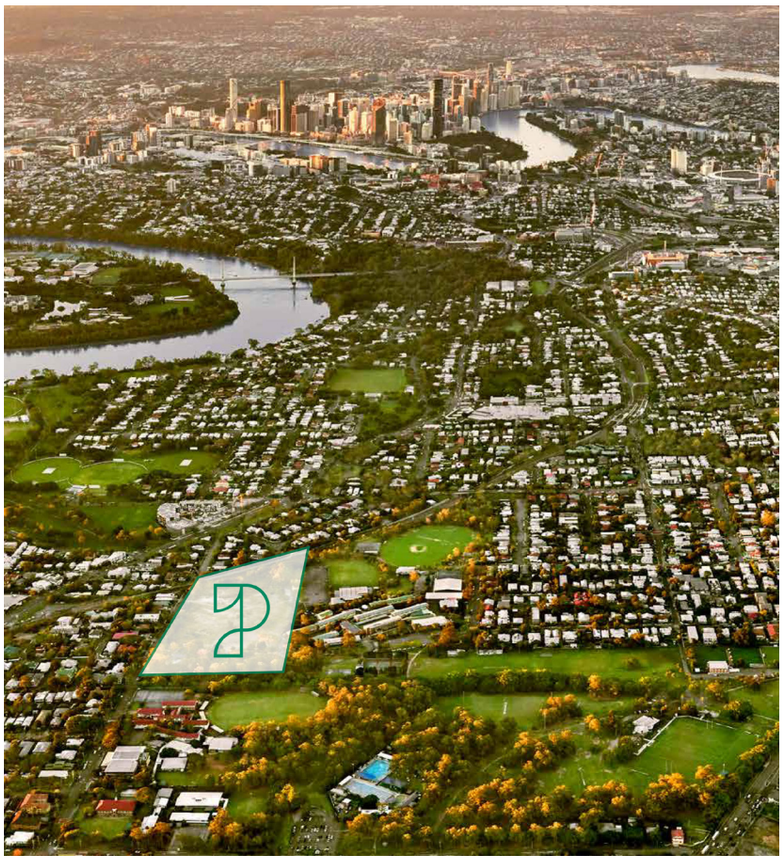

YERONGA CONSTRUCTION UPDATE – SEPTEMBER 2021

Works to remove asbestos containing material (ACM) identified at the northern end of the former TAFE site are now complete.

The next stage in the urban renewal project, to be known as Parkside Yeronga, is the lodgement of the master plan development application (DA). The DA has been lodged and includes for a Material Change of Use and Reconfiguring a Lot.

The DA and supporting documents are available for review on the Economic Development Queensland's (EDQ) Current applications and approvals web page, reference DEV2021/1221.

The DA will be publicly notified for a period of 20 business days. During the notification or submission period any interested parties will have an opportunity to make a formal submission. EDQ will advise details about the notification period once dates have been confirmed and outline the process for making a submission before the notification period commences.

The proposed Parkside Yeronga master plan includes a permanent home for the Yeronga Community Centre (YCC) and a purpose-built Children's Health Queensland (CHQ) services hub.

EDQ's role is to deliver essential infrastructure across the site including roads, kerb and channel, stormwater drainage, sewer installation and connection to potable water. These works are expected to begin in August 2022. Further details will be provided in future construction updates.

YCC and CHQ will lodge their own development applications in due course. This will be contingent on the finalisation of the master plan DA.

If you have any questions about the Parkside Yeronga project, or to stay up to date about the master plan DA, please contact us through the Have your Say website, or email edqengagement@dsdilgp.qld.gov.au.
