CONSTRUCTION UPDATE - MacArthur Avenue road works

Works along MacArthur Avenue are expected to be completed by March 2022.

Over the Christmas period, Northshore road users will continue to drive on the 'South' alignment of MacArthur Avenue, near the Bincote and Theodore Streets intersections, to access Northshore Carparks 1 and 2 while BMD complete the works in the northern verge.

In early March 2022 (weather permitting), access will switch to the 'North' alignment of MacArthur Avenue for a few weeks while sewer works are completed in the southern verge.

Throughout these works traffic management and directional signage will continue to assist with safe traffic movements.

Government**

In late February 2022, the main road works between Bincote Street and Angora Road will be complete, with MacArthur Avenue opening in March 2022.

Road users should take note of the road layout change, as the central median separating the north and south alignment will be removed and line-marking will be in place. This change will enable the creation of additional services in the verge such as increased footpath widths, a new

cycle-path, landscaping and bio-basin treatment devices.

After MacArthur Avenue is opened there will be ongoing works in the verge due to delays with public utility providers which is beyond our control. These works will be managed to ensure continued use of MacArthur Avenue once opened but there is likely to be times of traffic management during the balance verge works into March 2022.

Finally, please note that the Riverwalk diversion around the Northshore Tennis Park will also continue into the New Year. However, over the Christmas period a section will be opened for full public access along the riverfront between 22 December 2021 and 3 January 2022. The Riverwalk will then close from 4 January to late March 2022.

Thank you for your patience and understanding.
